MOBILE CLINICAL UNIT

RIGHT BEHIND YOU SINCE 1958

IN SAFE HANDS

By working in collaboration with doctors and key stakeholders within the health service, we have been able to understand the challenges that they are facing and have designed a solution that will have a positive impact for both clinical staff and patients.

When investing in the Ifor Williams, Mobile Clinical Unit, you do so with the reassurance that it is designed and built without compromise by the UK and Europe's leading trailer manufacturer.

For over 60 years, people have put their trust in our trailers. Starting in 1958, in rural North Wales, the company's first trailer models were designed for the farming and agricultural community.

Many decades on, we manufacture a diverse range of trailers, spanning into hundreds of different models, combining cutting edge design and engineering excellence with our long-standing reputation for high quality and durability.

MOBILE CLINICAL UNIT

The Ifor Williams, Mobile Clinical Unit, is an innovative solution which has been designed to increase clinical capacity, whilst prioritising the safety of patients and staff and allowing for flexible use in a variety of healthcare contexts.

The Mobile Clinical Unit provides a number of solutions, not only as a safe and separate area for Covid-19 patient assessments, but also for wider clinical practice and other applications:

Covid-19 Applications

- Providing safe and separate facilities, to keep symptomatic patients away from non-symptomatic patients.
- Covid-19 Vaccination Unit.

Routine Clinical Applications

- Increasing clinical capacity for routine clinical assessments.
- Vaccination unit to support routine vaccinations for children in school or for routine winter vaccinations in the community.
- Mobile Clinical Unit for rural communities for GP assessments or for hospital specialty out-reach services.

Other Applications

- Occupational health assessments on-site for companies and businesses also faced with the need to separate and assess staff, rapidly.
- Mobile Clinical Unit for First Aid at large events.
- A Mobile Clinical Unit for Contractors working remotely and in need of additional Welfare Units to look after staff appropriately.

WHY CHOOSE AN IFOR WILLIAMS MOBILE CLINICAL UNIT?

The Mobile Clinical Unit is a variant of the established Business Inabox Range of trailers. Through the Business Inabox, we have been designing and manufacturing mobile solutions for hundreds of customers, across a variety of industries, over many years.

With this bespoke range of trailers, we are used to working with industry experts and key stakeholders from a variety of different sectors. We always listen, understand the problem, and provide a well-thought-out solution, with excellence in engineering and design always being at the forefront of our work.

As Britain's leading trailer manufacturer, we pride ourselves on leading innovation and manufacturing products to the highest standards. We have over 60 years of trailer manufacturing expertise which is demonstrated in the quality and durability of all our products.

Our Design Engineers have perfected all the major components including axle assemblies, suspension, and chassis ensuring the trailers constantly perform at their best. We have invested in the latest production facilities and galvanizing plants, giving us full control of the quality of all the key components assembled on our trailers.

KEY FEATURES

Separate Entry Points for Staff and Patients

To minimise direct contact between staff and patients.

Minimal Surfaces

To help with ease and speed of cleaning in between patient use.

Windows with Privacy Screens

A window within the consultation room allows for important ventilation with screens to ensure patient privacy.

Heater - 230V

Installed to provide comfort and a safe working environment during the colder winter months.

Large Consultation Room

To ensure that 2m social distancing can be maintained, when direct contact with the patient is not required.

Separate Antechamber

With worktop, fixed storage, and deployable plastic storage containers. Linking the staff entrance point to the main consultation room, this space allows the member of clinical staff to safely prepare for the consultation and put on the necessary PPE.

Bright LED Lights

12V wall lights, 230V ceiling lights and rooflights providing natural light and ventilation. This provides a professional setting to allow clinical staff to conduct a thorough and rigorous examination.

12V Battery

With 230V charger. Provides power to light the unit, when mains electricity is not available.

KEY FEATURES

Access Steps

The fold up access steps make the Mobile Clinical Unit easy to enter and exit. For patient access a large double step will also be provided with a handrail.

Rear Propstand / Front Corner Steadies

Wind down corner steadies at the front and drop down propstands at the rear to stabilise the unit.

Mains Electricity Hook Up

Provides a continuous power supply, where mains electricity can be accessed.

Vinyl Flooring

Both durable and easy to clean, vinyl flooring is ideal for clinical use.

OPTIONAL EXTRAS

Tie Rings

Can be used to secure any equipment while you are on the move.

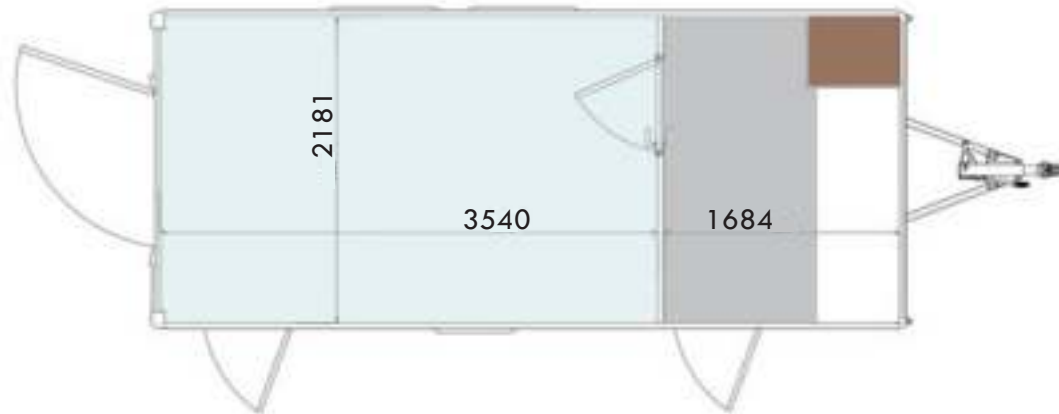

Solar Panel

The solar panel is positioned on the roof of the unit and re-charges the battery during daylight hours.

SPECIFICATIONS

Please see the trailer specifications below.

| Model | Tyres | Gross Weight | Unladen Weight | Internal Length | Internal Width | Overall Length | Overall Width |
|----------------------|------------|--------------|----------------|-----------------|----------------|----------------|---------------|
| Mobile Clinical Unit | 195/60R12C | 3500kg | 1750kg | 5.22 m | 2.18 m | 6.52 m | 2.33m |

TRAILER WRAPPING

Vinyl graphics can be used to add a logo, or for maximum impact, the whole trailer can be covered in a detailed wrap, giving your Mobile Clinical Unit visual appeal, branding, or even visual instructions for patients.

The vinyl wrap is of very good quality and acts as a protective barrier to your trailer. It protects paintwork and panels from stone chips and minor abrasions. The wrap will last many years because of the anti-UV fade technology. It can easily be removed should you wish to update the graphics or return the trailer to its original state and colour. The trailer can be washed by hand or jet washed but we advise against the use of mechanical car washes as the abrasive action could damage the wrap.

Cassette Lift

ACCESSIBILITY

The Mobile Clinical Unit comes with one of two access options as pictured.

Cassette Lift

For those taking the Mobile Clinical Unit on the road, the Cassette Lift provides an accessible solution, no matter where you need to go. Whether you provide care at community hospitals, care homes, schools, events, or in rural communities the Cassette Lift provides access for everyone, everywhere.

Ramp Access

If you are looking for a medium to longer-term solution at a single-site, then the Mobile Clinical Unit can be manufactured with a ramp option.

*Please note, that the ramp connects directly with the unit. The porch seen in the picture, between the ramp and the unit, is not a required feature.

Ramp Access
